8. Describe what you would do in the following scenario.

You have been working hard at your place of employment for several months. As a result of your job you have accumulated a sizeable pile of "scrap" metal (old a/c compressors, window regulators, water pumps, etc.) around your work area. One day, you are approached by an individual that buys scrap metal and he offers you money for the discarded components you have collected. By all estimations, the pile of metal is trash with no core charges pending and none of the customers wanted their old parts back. What is your answer to the person that wants to pay you for the scrap metal?
